SME100

Mr. Ajay Agarwal, believes in the values of diligence and smart work. He also believed that the key driver, for future growth, in software-based process automation solutions, lies in micro-architecture based reusable components that offer 'simple solutions' to 'complex problems'. Ajay Agarwal, Director & Co-founder of Servosys Solutions, an alumnus of HBTI, had developed software products and led teams in the areas of Business Process Management, Document Management System, Data Achieving, Imaging, etc. ever since the days when the Internet had not proliferated yet and mobile devices were unimaginable for use in business. At the turn of the century, the Internet started booming in the country. A few years down the line, cameras pre-fitted in mobile phones became a reality.

Servosys Solutions (a unit of EML Consultancy Services Pvt Ltd) is a software product and technology services company, that draws exhilaration from accepting challenges and solving clients' business problems that others cannot solve. Their mobility-based rapid business process automation platform has become very popular with large banking and financial services groups and many new generation banks. In order to deliver to their clients Mr. Ajay worked like a partner, rather than a vendor, and helped their clients increase their market share rapidly, by drastically shortening their process cycle time, and reducing human interventions. Servosys Solutions excels in combining the power of multiple technologies, viz. Business Process Management (BPM), Document Management System (DMS), Robotics Process Automation (RPA), Mobile Imaging & Web-Based Scanning for providing advanced automation solutions that have even surpassed the technology level of the solutions used by clients in the developed countries.

Ajay Agarwal
Director & Co-Founder

Servosys Solutions has grown from strength to strength, constantly innovating and out performing its global competitors in the space of process automation technologies. The company has established many new benchmarks and has helped banks and many other tech-driven enterprises achieve the required process efficiencies, which in turn help save time, money and also meet quality and compliance requirements. In the post Covid-19 era the digital platform developed by Servosys assumes even more significance as Servosys is enabling touchless business transactions like opening deposit accounts, loans, collections and so on.

Mr. Ajay Agarwal, Director & Co-Founder of the company said, "It is indeed a privilege for Servosys Solutions to get featured in BusinessWise for contributions that we have made through technology innovations. This recognition encourages us to invest even more on the R&D and IPR development. We have taken competition head-on with the global players and have become the first choice of many large banks and non-bank customers."
